

Open svg file in text editor or run `$cat 'Black Hole.svg'` it will show the contents of the SVG file.

Notice the tspan element: "sodipodi", each tspan has a char element before the end of tspan

```
id="tspan3748">C</tspan><tspan
sodipodi:role="line"
x="107.43014"
y="132.08942"
style="font-size:0.00352781px;line-height:1.25;fill:
3332;"
id="tspan3754">Z</tspan><tspan
sodipodi:role="line"
x="107.43014"
y="132.09383"
style="font-size:0.00352781px;line-height:1.25;fill:
3332;"
id="tspan3756">4</tspan><tspan
sodipodi:role="line"
x="107.43014"
y="132.09824"
style="font-size:0.00352781px;line-height:1.25;fill:
3332;"
id="tspan3758">0</tspan><tspan
```

Concatenate all the characters identified and we get the flag
