

Fan Site CTF hosted on : <http://challenge.cz4067-ctf-trial.site:3101/>

First, Access the website and inspect its element.

You will come across this html paragraph that was hidden

```
</div>
<p hidden="true"> == $0
    "Just give us an *alert* saying "i have seen all" and our admin will contact you :))"
</p>
<footer class="card-footer">...</footer>
<script>...</script>
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0-alpha1/dist/js/bootstrap.bundle.js">
```

Try: alert("I have seen all") in the console did not return anything, suggesting the need to modify the HTML file to trigger an alert and obtain the flag.

Look for something in the page that can trigger an alert → The search button.

```
<div class="text-center">
  <button type="submit" class="btn btn-primary" id="search-bid">Search</button>
</div>
</form>
```

Modify the search button to listen for onClick events

```
<div class="form-group">...</div>
<div class="text-center">
  <button onclick="alert('i have seen all')" type="submit" class="btn btn-primary" id="search-bid">Search</button>
</div>
</form>
</div>
```

Upon clicking the button, an alert will appear followed by the flag

l.site:3101

u iNTU

PayPa

challenge.cz4067-ctf-trial.site:3101 says

Flag is CZ4067{reF1eCt3d_xSs_90w3r_63y0nd_1Mag1n4t10n}

OK

dings! You'll love it <3

Reason for modifying the html to listen for an onclick event: modifying the HTML file was necessary since the webpage was already statically loaded and modifying the JS file would not have any effect.
